

## Surrey Club Meeting Sustainability Credentials Including Site Waste Management Plans and EMS

19th March 08 - Guildford from 16.00 – 19.00

**A company that demonstrates environmental performance and a commitment to sustainability can achieve site efficiency up to 40%<sup>1</sup>.**

In today's fast changing market, public and private sector clients are increasingly demanding evidence of environmental credentials. Construction companies are beginning to recognise the competitive advantage accreditation gives them.

**Site Waste Management Plans became a legal requirement on 6<sup>th</sup> April 2008.** SWMP's are a key element of an environmental management system and this workshop will look at ways to accelerate implementation of an EMS.

<sup>1</sup> Measuring to Manage - Envirowise

This event spearheads CE Surrey Club's activities to expand its membership in 2008. Surrey is home to numerous construction businesses, major industry clients, consultants and contractors.

The Constructing Excellence Surrey Club was established in 2003 to support all these organisations by helping individuals and firms to network, to keep in touch with national initiatives and to provide local learning opportunities. It has run many successful events, both on its own and in partnership with organisations such as SECBE and Envirowise.

**If you would like to book a place at this free workshop or would like more information about the CE Surrey Club and future activities please return the fax back form on the reverse or email [events@secbe.org.uk](mailto:events@secbe.org.uk)**

Who should attend?

■ Architects ■ Clients ■ Designers ■ Contractors ■ Developers
